

NEW KON Driver Licences Surrender Procedure

Surrender Procedure.

“A State may return a surrendered license to a driver after physically marking it so that it cannot be mistaken for a valid document. Simply punching a hole in the expiration date of the document is insufficient. A document perforated with the word “VOID” is considered invalidated.”

Recent design improvements to our perforators include back and side stops which will ensure the proper placement of the “VOID” perforation on surrendered driver licenses and I.D. cards.

Model 15F Electric “VOID” Perforator

This electric perforator is both robust and compact in size. It is designed specifically for the purpose of perforating the word “VOID” on driver licenses and ID cards. The insertion area is set-up with a side guide and a backstop for perfect alignment. This feature will ensure that the document is perforated in the proper area and will not obliterate personal information. Operation is safe and easy to use. The “VOID” perforation is in compliance with Legislation #384.211.

Model P206V-SP Lever Model Perforator

A cost-effective, reliable, easy-to-use method of conforming to regulations regarding the “VOID” perforation of individual driver licenses that are subject to surrender under Legislation #384.211. This unit is designed to perforate the word “VOID” in the surrendered documents that are U.S. style, plastic coated ID’s and driver licenses.

Model PV20-SP Mini Perforator

The PV20-SP mini perforator is the sensible alternative to using a hand-held paper punch to “VOID” surrendered driver licenses and I.D. cards. The NEW KON Model PV20-SP is uniquely designed as an economically priced, light duty table top perforator that is both compact and portable. Operation is easy and safe. This secure method of punching holes in drivers licenses and plastic coated ID’s will permanently “VOID” these documents as required by Legislation #384.211.

We offer a variety of perforators and embossers to fulfill your security requirements.
